In 1995 we started cooperation with the company BOCO PARDUBICE machines, Ltd. at the opportunity of repairs and production of screws and chambers for our injection moulding machines. From experience we can say that the quality of parts repaired by BOCO Company, by means of carbide weld deposit technologies, have greater durability than the original parts. We have the same experience with the new parts made by BOCO Company.

In 2010 BOCO PARDUBICE Machines installed on our machines thermal insulations which bring us considerable savings in energy consumption and significantly reduce our production costs.

Radek Hornof
Manager of Maitenance
