### Supplier evaluation

Dear business partners

Our company cooperates with BOCO Pardubice since 1998. The widest cooperation is in the field of our used parts renovation and supplying of new spare parts for plastics machinery, especially for moulding machines.

New special techniques developed by BOCO company helped us to achieve almost three-times longer lifespan of main machinery parts, and therefore we reached direct cost-savings and increased effectivity in machinery utilization. BOCO company successfully cooperates with our plant on energy-saving projects as well.

Pricing policy of BOCO Pardubice is progressive and they have no problems with delivery times.

BOCO company is owner of the ISO9001:2001 quality certificate issued by TÜV. Partnership with BOCO company is helpful from our point of view and we look forward to next cooperation.

Best regards,  
Vaclav Maruska
